## **MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING**

The accompanying financial statements of Alexandria Minerals Corporation were prepared by management in accordance with International Financial Reporting Standards. Management acknowledges responsibility for the preparation and presentation of the financial statements, including responsibility for significant accounting judgments and estimates and the choice of accounting principles and methods that are appropriate to the Company's circumstances.

Management has established processes, which are in place to provide them sufficient knowledge to support management representations that they have exercised reasonable diligence that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the financial statements and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented by the financial statements.

The Board of Directors is responsible for reviewing and approving the financial statements together with other financial information of the Company and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee assists the Board of Directors in fulfilling this responsibility. The Audit Committee meets with management to review the financial reporting process and the financial statements together with other financial information of the Company. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the financial statements together with other financial information of the Company for issuance to the shareholders.

Management recognizes its responsibility for conducting the Company's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

(signed)  
Eric O. Owens  
Chief Executive Officer

(signed)  
Mario A. Miranda  
Chief Financial Officer

Toronto, Canada

## **Independent Auditors' Report**

To the Shareholders of  
Alexandria Minerals Corporation

We have audited the accompanying financial statements of Alexandria Minerals Corporation which comprise the statements of financial position as at April 30, 2012, April 30, 2011 and May 1, 2010 and the statements of loss, comprehensive loss, cash flows and shareholders' equity for the years ended April 30, 2012 and April 30, 2011, and a summary of significant accounting policies and other explanatory information.

### **Management's responsibility for the financial statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditors' responsibility**

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion, the financial statements present fairly, in all material respects, the financial position of Alexandria Minerals Corporation as at April 30, 2012, April 30, 2011 and May 1, 2010 and its financial performance and its cash flows for the years ended April 30, 2012 and April 30, 2011 in accordance with International Financial Reporting Standards.

## **Emphasis of matter**

Without qualifying our opinion, we draw attention to note 1 in the financial statements which describes that the Company will require additional financing in order to fund its planned activities. This condition, along with other matters set out in note 1, indicates the existence of material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**1. NATURE OF BUSINESS AND GOING CONCERN**

Alexandria Minerals Corporation (the "Company") is engaged in the acquisition, exploration and development of mineral resource properties in Canada. The Company is in the process of exploring, and has not yet determined whether there is an economically viable ore deposit on its properties. The Company was incorporated on May 27, 2002. To date, the Company has not earned revenue from its mineral properties. The Company's common shares are listed on the TSX Ventures Exchange under the symbol AZX, on the Frankfurt Stock Exchange under the symbol A9D and on the Pink Sheets USA under the symbol ALXDF. The primary office is located at 1 Toronto Street, Suite 201, Toronto, Ontario, M5C 2V6.

The financial statements were approved by the Board of Directors on August 2, 2012.

In order to meet future expenditures and cover administrative costs, the Company will need to raise additional financing. The Company has had recurring losses and will require additional financing to fund its continuing exploration efforts. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favourable to the Company. These financial statements have been prepared on a going concern basis that assumes the Company will be able to continue to realize its assets and discharge its liabilities in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. Management is not aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern.

In the event the Company is not able to obtain adequate funding, there is uncertainty as to whether the Company will be able to maintain and complete the acquisition and development of its property interests. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities that would be necessary if the Company were unable to obtain adequate financing. Changes in future conditions could require material write downs of the carrying values of certain assets.

**2. SIGNIFICANT ACCOUNTING POLICIES**

The significant accounting policies used in the preparation of these financial statements are described below.

**(a) Basis of preparation and adoption of IFRS ("International Financial Reporting Standards")**

These are the Company's first annual financial statements that are prepared in accordance with International Financial Reporting Standards ("IFRS"). Previously, the Company prepared its annual and interim financial statements in accordance with Canadian Generally Accepted Accounting Principles ("GAAP"). IFRS 1, First-Time Adoption of IFRS ("IFRS 1") has been applied and the impact of the transition from Canadian GAAP to IFRS is explained in Note 16.

These financial statements have been prepared in accordance with IFRS issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"), effective for the Company's reporting for the year ended April 30, 2012.

The accounting policies set out below have been applied consistently to all periods presented in these financial statements. They also have been applied in preparing an opening IFRS financial position at May 1, 2010 (Note 16) for the purposes of the transition to IFRS, as required by IFRS 1.

**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(b) Basis of measurement**

These financial statements have been prepared on a historical cost basis except for the revaluation of certain financial instruments to fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

**(c) Financial instruments**

All financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership.

Financial assets and liabilities are offset and the net amount is reported in the financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

At initial recognition, the Company classifies its financial instruments in the following categories depending on the purpose for which the instruments were acquired:

- (i) Financial assets and liabilities at fair value through profit or loss ("FVTPL"): A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term. Derivatives are also included in this category unless they are designated as hedges. Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the statement of loss. Gains and losses arising from changes in fair value are presented in the statement of loss within other gains and losses in the period in which they arise. Financial assets and liabilities at FVTPL are classified as current except for the portion expected to be realized or paid beyond twelve months of the reporting date, which is classified as non-current.
- (ii) Available-for-sale investments: Available-for-sale investments are non-derivatives that are either designated in this category or not classified in any of the other categories. Available-for-sale investments are recognized initially at fair value plus transaction costs and are subsequently carried at fair value. Gains or losses arising from changes in fair value are recognized in other comprehensive loss. Available-for-sale investments are classified as non-current, unless the investment matures within twelve months, or management expects to dispose of them within twelve months. Interest on available-for-sale investments, calculated using the effective interest method, is recognized in the statement of loss as part of interest income. Dividends on available-for-sale equity instruments are recognized in the statement of loss as part of other gains and losses when the Company's right to receive payment is established. When an available-for-sale investment is sold or impaired, the accumulated gains or losses are moved from accumulated other comprehensive loss to the statement of loss and are included in other gains and losses.
- (iii) Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are initially recognized at the amount expected to be received, less, when material, a discount to reduce the loans and receivables to fair value. Subsequently, loans and receivables are measured at amortized cost using the effective interest method less a provision for impairment.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**  
**Years ended April 30, 2012 and April 30, 2011**

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(c) Financial instruments (Continued)**

- (iv) Other financial liabilities: Other financial liabilities are recognized initially at fair value net of any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortized cost using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest and any transaction costs over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or (where appropriate) to the net carrying amount on initial recognition. Other financial liabilities are de-recognized when the obligations are discharged, cancelled or expired.

The Company's financial instruments consist of the following:

<b>Financial assets:</b>	<b>Classification:</b>
Cash	FVTPL
Short-term investments	FVTPL
Investment in available-for-sale securities	Available-for-sale investments
Sales tax and sundry receivable	Loans and receivables
Quebec refundable tax credits and mining duties receivable	Loans and receivable

  

<b>Financial liabilities:</b>	<b>Classification:</b>
Accounts payable and accrued liabilities	Other financial liabilities

**Impairment of financial assets**

At each reporting date, the Company assesses whether there is objective evidence that a financial asset is impaired. If such evidence exists, the Company recognizes an impairment loss, as follows:

- (i) Financial assets carried at amortized cost: The loss is the difference between the amortized cost of the loan or receivable and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. The carrying amount of the asset is reduced by this amount either directly or indirectly through the use of an allowance account.
- (ii) Available-for-sale financial assets: The impairment loss is the difference between the original cost of the asset and its fair value at the measurement date, less any impairment losses previously recognized in the statement of comprehensive loss. This amount represents the cumulative loss in accumulated other comprehensive loss that is reclassified to net loss.
- (iii) Impairment losses on financial assets carried at amortized cost are reversed in subsequent periods if the amount of the loss decreases and can be related objectively to an event occurring after the impairment was recognized. Impairment losses on available-for-sale equity instruments are not reversed.

---

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(d) Cash**

Cash comprises cash in banks and on hand.

**(e) Short-term investments**

Short-term investments are liquid investments with a maturity greater than three months but less than one year.

**(f) Quebec refundable tax credits and mining duties receivable**

The Company is entitled to a credit on duties refundable for loss under the Mining Duties Act. This credit on duties refundable for loss on exploration costs incurred in the Province of Quebec at tax rates ranging from 12% to 16% has been applied against the costs incurred (Note 7).

Furthermore, the Company is entitled to a refundable tax credit for resources for mining companies on qualified expenditures incurred. The refundable tax credit for resources may reach 35% of qualified expenditures incurred. This tax credit has been applied against the costs incurred (Note 7).

**(g) Property and equipment**

Property and equipment are recorded at cost, less accumulated amortization and accumulated impairment loss. Amortization is provided using the following rate:

Computer equipment	30%
Office equipment	20%
Computer software	30%
Leasehold improvements	Straight-line 5 years

Property and equipment are assessed for future recoverability or impairment on an annual basis by estimating future net discounted cash flows and residual values or by estimating replacement values. When the carrying amount of property and equipment exceeds the estimated net recoverable amount, the asset is written down to the extent the estimated net recoverable amount exceeds the carrying amount with a charge to income in the period that such determination is made.

**(h) Mineral rights and deferred exploration expenditures**

The Company capitalizes all exploration costs that result in the acquisition and retention of resource properties or an interest therein. The amount shown for mineral rights and deferred exploration expenditures represents costs to date, including acquisition, maintenance, exploration, salaries based on time spent, and management fees. All other costs are expensed as incurred.

**(i) Share issue costs**

Incremental costs directly attributable to the issuance of shares or warrants are recognized as a deduction from the proceeds in equity in the period where the transaction occurs.

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(j) Restoration, rehabilitation and environmental obligations**

A legal or constructive obligation to incur restoration, rehabilitation and environmental costs may arise when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pretax rate that reflects the time value of money are used to calculate the net present value. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market based discount rate, amount or timing of the underlying cash flows needed to settle the obligation.

**(k) Provisions**

A provision is recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be reliably estimated. If the effect is material, provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

The Company has no material provisions at April 30, 2012, April 30, 2011 and May 1, 2010.

**(l) Impairment of non-financial asset**

At each date of the statement of financial position, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is an indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the assets belong.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years.

**(m) Share based payments**

The fair value of the stock options granted is determined using the Black-Scholes option pricing model and management's assumptions and recorded as share based payments expense over the vesting period of the stock options, with the offsetting credit recorded as an increase in reserve for share based payments. If the stock options are exercised, the proceeds are credited to share capital and the fair value at the date of grant is reclassified from reserve for share based payments to share capital.

**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(n) Flow-through shares**

The Company finances some exploration expenditures through the issuance of flow-through shares. The resource expenditure deductions for income tax purposes are renounced to investors in accordance with the appropriate income tax legislation. The Company recognizes a deferred tax liability for flow-through shares and a deferred tax expense, at the moment the eligible expenditures are incurred. The difference between the quoted price of the common shares or the amount recognized in common shares and the amount the investors pay for the shares is recognized as an other liability which is reversed as a deferred tax recovery when eligible expenditures have been made.

**(o) Income taxes**

Income tax on the profit or loss for the periods presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in other comprehensive income or in equity, in which case it is recognized in other comprehensive income or in equity, respectively.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax is provided using the liability method, providing for temporary differences at the date of the statement of financial position between the tax bases of assets and liabilities and their carrying amounts in the financial statements. The following temporary differences are not provided for if it arises from the initial recognition of goodwill or the initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the date of the statement of financial position.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Deferred income tax assets and liabilities are presented as non-current and are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Tax on income in interim periods accrued using the tax rate that would be applicable to expected annual earnings.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(p) Loss per common share**

Basic loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period, including contingently issuable shares which are included when the conditions necessary for the issuance have been met. Diluted loss per share is calculated in a similar manner, except that the weighted average number of common shares outstanding is increased to include potentially issuable common shares from the assumed exercise of common share purchase options and warrants, if dilutive. The number of additional shares included in the calculation is based on the treasury stock method for options and warrants.

**(q) Segment disclosures**

The Company currently operates in a single segment - the acquisition, exploration and development of mineral properties. All of the Company's activities are conducted in Canada.

**(r) Use of estimates**

Many of the amounts included in the financial statements require management to make judgments and/or estimates. These judgments and estimates are continuously evaluated and are based on management's experience and knowledge of the relevant facts and circumstances. Actual results may differ from the amounts included in the financial statements.

Areas of significant judgment and estimates affecting the amounts recognized in the financial statements include:

(i) Impairment of non-financial assets

The Company's fair value measurement with respect to the carrying amount of non-financial assets is based on numerous assumptions and may differ significantly from actual fair values. The fair values are based, in part, on certain factors that may be partially or totally outside of the Company's control. This evaluation involves a comparison of the estimated fair values of non-financial assets to their carrying values. The Company's fair value estimates are based on numerous assumptions. The fair value estimates may differ from actual fair values and these differences may be significant and could have a material impact on the Company's financial position and result of operations. Assets are reviewed for an indication of impairment at each date of the statement of financial position. This determination requires significant judgment. Factors which could trigger an impairment review include, but are not limited to, significant negative industry or economic trends, interruptions in exploration and evaluation activities and significant drop in precious metal prices.

(ii) Recognition of deferred income tax assets and the measurement of income tax expense

Periodically, we evaluate the likelihood of whether some portion of the deferred tax assets will not be realized. Once the evaluation is completed, if we believe that it is probable that some portion of the deferred tax assets will fail to be realized, the Company records only the remaining portion for which it is probable that there will be available future taxable profit against which the temporary differences can be utilized. Assessing the recoverability of deferred income tax assets requires management to make significant judgment. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the date of the statement of financial position could be impacted.

**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(r) Use of estimates (Continued)**

(iii) Valuation of share-based payments

The Company records all share-based payments using the fair value method. The Company uses the Black-Scholes option pricing model to determine the fair value of stock options, warrants and broker warrants and a binomial model for compensation options. The main factor affecting the estimates of the fair value of stock options, warrants, broker warrants and compensation options is the stock price expected volatility used. The Company currently estimates the expected volatility of its common shares based on comparable information derived from the trading history of guideline public companies which are in a similar situation to the Company taking into consideration the expected life of the options.

(iv) The estimated useful lives and residual values of property and equipment and the measurement of depreciation expense

Management estimates the useful lives of property and equipment based on the period during which the assets are expected to be available for use. The amounts and timing of recorded expenses for depreciation of property and equipment for any period are affected by these estimated useful lives. The estimates are reviewed at least annually and are updated if expectations change as a result of physical wear and tear, technical or commercial obsolescence and legal or other limits to use. It is possible that changes in these factors may cause significant changes in the estimated useful lives of the Company's property and equipment in the future.

**(s) Interest**

The Company classifies interest received and interest paid as an operating cash flow within the Statement of Cash Flows.

**(t) New accounting standards not yet adopted**

The IASB issued the following standards which are relevant but have not yet been adopted by the Company: IFRS 9, Financial instruments, IFRS 10, Consolidated Financial Statement, IFRS 11, Joint Arrangements, IFRS 12, Disclosure of Interests In Other Entities, IFRS 13, Fair Value Measurement, and amended IAS 1, Presentation of Financial Statements. Each of the new standards is effective for annual periods beginning on or after January 1, 2013, except IFRS 9 which is effective for annual periods beginning on or after January 1, 2015, with early adoption permitted. The Company has not yet begun the process of assessing the impact that the new and amended standards will have on its financial statements or whether to early adopt any of the new requirements.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(t) New accounting standards not yet adopted (Continued)**

The following is a brief summary of the new standards:

*IFRS 9 - Financial instruments - classification and measurement*

IFRS 9, Financial Instruments, was issued in November 2009. It addresses classification and measurement of financial assets and replaces the multiple category and measurement models in IAS 39, Financial Instruments – Recognition and Measurement, for debt instruments with a new mixed measurement model with only two categories: amortized cost and FVTPL. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at FVTPL or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends, to the extent not clearly representing a return of investment, are recognized in profit or loss; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely.

Requirements for financial liabilities were added in October 2010 and they largely carried forward existing requirements in IAS 39, except that fair value changes due to credit risk for liabilities designated at fair value through profit and loss would generally be recorded in other comprehensive income. IFRS 9 is required to be applied for accounting periods beginning on or after January 1, 2015, with earlier adoption permitted.

*IFRS 10 – Consolidation*

IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12, Consolidation—Special Purpose Entities and parts of IAS 27, Consolidated and Separate Financial Statements. IFRS 10 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

*IFRS 11 -- Joint Arrangements*

IFRS 11, Joint arrangements, was issued by the IASB in May 2011. IFRS 11 is a new standard which focuses on classifying joint arrangements by their rights and obligations rather than their legal form. Entities are classified into two groups: parties having rights to the assets and obligations for the liabilities of an arrangement, and rights to the net assets of an arrangement. Entities in the former case account for assets, liabilities, revenues and expenses in accordance with the arrangement, whereas entities in the latter case account for the arrangement using the equity method. IFRS 11 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

*IFRS 12 -- Disclosure of Interest In Other Entities*

IFRS 12, Disclosure of Interests in Other Entities, was issued by the IASB in May 2011. IFRS 12 is a new standard which provides disclosure requirements for entities reporting interests in other entities, including joint arrangements, special purpose vehicles, and off balance sheet vehicles. IFRS 12 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

Years ended April 30, 2012 and April 30, 2011

---

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**(t) New accounting standards not yet adopted (Continued)**

*IFRS 13 - Fair Value Measurement*

IFRS 13 is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures. IFRS 13 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

*IAS 1 - Presentation of financial statements*

IAS 1 was amended by the IASB in June 2011 in order to align the presentation of items in other comprehensive income with US GAAP standards. Items in other comprehensive income will be required to be presented in two categories: items that will be reclassified into profit or loss and those that will not be reclassified. The flexibility to present a statement of comprehensive income as one statement or two separate statements of profit and loss and other comprehensive income remains unchanged. The amendments to IAS 1 are effective for annual periods beginning on or after July 1, 2012.

**3. CAPITAL MANAGEMENT**

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return through enhancing the share value.

The Company monitors its capital structure and makes adjustments according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, repurchasing outstanding shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by management and the Board of Directors on an ongoing basis.

The Company considers its capital to be equity, which is comprised of share capital, reserve for warrants, share based payments, accumulated other comprehensive income (loss) and deficit which at April 30, 2012 totaled \$17,869,631 (April 30, 2011 - \$16,997,166, May 1, 2010 - \$12,640,916). The Company manages capital through its financial and operational forecasting processes. The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on its exploration activities. Selected information is provided to the Board of Directors of the Company. The Company's capital management objectives, policies and processes have remained unchanged during the year ended April 30, 2012. The Company is not subject to any capital requirements imposed by a lending institution.

---

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**4. PROPERTY AND FINANCIAL RISK FACTORS**

(a) Property risk

The Company's significant projects are the Orenada, Akasaba, Sleepy and Other Cadillac Break Properties together with the Other Quebec Properties and, in Ontario, the Matachewan Property. Unless the Company acquires or develops additional significant properties, the Company will be solely dependent upon these properties. If no additional mineral resource properties are acquired by the Company, any adverse development affecting these properties may have a material adverse effect on the Company's financial condition and results of operations.

(b) Financial risk factors

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate and commodity and equity price risk). Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

**Credit risk**

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, sales tax and sundry receivable (includes HST), Quebec refundable tax credits and mining duties receivable and short-term investments. Cash and short-term investments are held with a reputable Canadian chartered bank, from which management believes the risk of loss to be minimal.

Financial instruments included in sales tax and sundry receivable comprise of sales tax receivable from government authorities (includes HST) in Canada and deposits held with service providers. Sales tax and sundry receivables are in good standing as of April 30, 2012. Management believes that the credit risk concentration with respect to financial instruments included in sales tax and sundry receivable is minimal.

Financial instruments included in Quebec refundable tax credits and mining duties receivable comprise of mining expenditure refunds from the Quebec Government (Canada). Quebec refundable tax credits and mining duties receivable are in good standing as of April 30, 2012. Management believes that the credit risk concentration with respect to financial instruments included in Quebec refundable tax credits and mining duties receivable is minimal.

**Liquidity risk**

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at April 30, 2012, the Company had cash and short-term investments of \$2,451,766 (April 30, 2011 - \$2,910,112, May 1, 2010 - \$2,036,098) to settle current liabilities of \$333,482 (April 30, 2011 - \$508,525, May 1, 2010 - \$245,889). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

---

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**4. PROPERTY AND FINANCIAL RISK FACTORS (continued)**

(b) Financial risk factors (continued)

**Market risk**

*Interest rate risk*

The Company has cash and short-term investments balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by the Company's Canadian chartered bank. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its bank.

*Commodity and equity price risk*

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, as it relates to precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

The Company's investments in Aurizon Mines Ltd. ("Aurizon") and Integra Gold Corp. (formerly Kalahari Resources Inc.) ("Integra") are subject to fair value fluctuations arising from changes in the Canadian mining sector and equity markets and currently amount to \$30,407 (April 30, 2011 - \$1,403,885, May 1, 2010 - \$454,476).

**Sensitivity analysis**

The Company has, for accounting purposes, designated its cash and short-term investments as held-for-trading, which is measured at fair value. Sales tax and sundry receivable and Quebec refundable tax credits and mining duties receivable are classified for accounting purposes as loans and receivables, which are measured at amortized cost which equals fair value. Investments are classified for accounting purposes as available-for-sale, which are measured at fair value. Accounts payable and accrued liabilities are classified for accounting purposes as other financial liabilities, which are measured at amortized cost which also equals fair value.

As of April 30, 2012, the carrying and fair value amounts of the Company's financial instruments are equivalent.

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period:

(i) The Company's other investments amounting to \$30,407 are subject to fair value fluctuations. As at April 30, 2012, if the fair value of the Company's other investments had decreased/increased by 50% with all other variables held constant, comprehensive loss for the year ended April 30, 2012 would have been approximately \$15,000 higher/lower. Similarly, as at April 30, 2012, reported shareholders' equity would have been approximately \$15,000 lower/higher as a result of a 50% decrease/increase in the fair value of the Company's other investments.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**  
**Years ended April 30, 2012 and April 30, 2011**

**4. PROPERTY AND FINANCIAL RISK FACTORS (continued)**

(c) Other risk factors

(i) Mineral property risk is significant. In particular, if an economic ore body is not found, the Company cannot enter into commercial production and generate sufficient revenues to fund its continuing operations. There can be no assurance that the Company will generate any revenues, achieve profitability or provide a return on investment in the future from any of the properties it may have an interest in.

(ii) Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the world market price of precious metals. Precious metal prices have fluctuated widely in recent years. There is no assurance that, even as commercial quantities of precious metals may be produced in the future, a profitable market will exist for them. A decline in the market price of precious metals also will require the Company to reduce its mineral resources, which could have a material and adverse effect on the Company's value. As of April 30, 2012, the Company was not a precious metals producer. As a result, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

**Fair value hierarchy**

The following table illustrates the classification of the Company's financial instruments within the fair value hierarchy as at April 30, 2012.

	Level 1	Level 2	Level 3	Total
Cash	\$1,951,766	\$ -	\$ -	\$1,951,766

The Company has retained an interest in, through option agreement or through staking, several gold exploration properties in Ontario and Quebec, Canada. All properties are located in areas adjacent to past or present mines, and all have indications of gold on the surface and in the subsurface. The properties are considered to be early stage exploration properties, and there are uncertainties with regard to the discovery of economically viable ore deposits on them.

**Cadillac Break Property Group (a)**

The Cadillac Break Property Group is a group of 21 properties, comprised of 689 claims, located in Bourlamaque, Louvicourt, and Vauquelin Townships, in the Val d'Or Mining District Quebec. The 21 properties are: 1) Airport, Ducros, Lourmet, Mid-Canada, Ormaque, Orenada, Orcour, Sabourin Creek, Trivio, Vaumon (formerly known as the Aur Properties; 2) the Robert, Deckeyser, Orenada Extension, Eddy Blocks, Trivio Extension, Annamaque, and Valdora; and 3) the Akasaba, Bloc Sud West, Bloc Sud Trivio and Sleepy properties formerly known as the Cambior properties. The Company holds 100% interest in all claims within these property groups, subject to a 2% - 2.5% Net Smelter Return Royalty ("NSR"), 40% of which can be purchased for \$1M.

(i) The Company purchased 100% interest in Teck Resources Limited's ("Teck") interest in the Annamaque Property. The terms of the Annamaque Purchase and Sale agreement, signed on June 17, 2009, are that for a 100%, Alexandria will issue to Teck 250,000 units (issued), consisting of one common share of the Company and one share purchase warrant exercisable at \$0.15 for two years. The property is subject to a 2% NSR, one-half of which may be purchased by the Company for \$800,000.

(ii) The Company purchased 100% of Teck's interest in the Valdora Property (51% of the total interest) by issuing to Teck 75,000 units, each unit consisting of one common share of the Company and one share purchase warrant exercisable at \$0.15 for two years. The property is subject to a fractional 2% NSR (2% of Teck's 51%), one half of which can be purchased for \$200,000.

(iii) On July 29, 2009, the Company issued 75,000 units (valued \$4,800) of Alexandria to acquire the remaining 49% interest in the Valdora Property, bringing the total interest in the property to 100%. Each unit consists of one common share of Alexandria plus one share-purchase warrant, where each warrant is exercisable for 2 years at \$0.15. The interest is subject to a 1% NSR, of which ½ may be purchased for \$200,000.

(iv) On September 30, 2009, the Company reported that it has optioned one claim from its Airport Property in Val d'Or to Kalahari Resources Inc. ("Kalahari"). The terms of the agreement with Kalahari for the Airport claim include a payment of \$25,000 cash (\$10,000 received) to the Company and the issuance of 500,000 (250,000 issued and valued at \$8,000) Kalahari common shares to the Company over a period of twelve months, as well as incurring \$35,000 in exploration expenditures over a period of 24 months. Alexandria retains a 2% NSR, one half of which may be purchased for \$1,000,000.

**Other Quebec Properties (b)**

Siscoe East Property

(i) The Siscoe East Property, located in Dubuisson Township near Val D'Or, Quebec. The property is comprised of a total of 96 claims governed by an Option/Joint Venture agreement, signed on June 25, 2008, between Niogold Mining Corporation and Alexandria, giving Niogold the option to earn a 50% interest in the claims. Under the terms of the agreement, in order to earn its 50% interest, Niogold must: 1) issue to Alexandria 650,000 shares from Niogold treasury stock in three tranches by June 11, 2010 (all shares have been issued); and 2) complete an aggregate of \$750,000 in exploration expenditures on the property by June 25, 2011 (completed). As these terms have been completed, Alexandria and Niogold are deemed to have formed a Joint Venture to explore and develop the Siscoe East Property.

(ii) All claims are subject to a 2% NSR, except for 13 claims which are subject to a sliding NSR payable to Virginia Mines Inc. as follows: 1) 2% NSR if gold price is less than US \$325 per ounce; 2) 2.5% NSR if gold price is between US \$325 and US \$375 per ounce; and 3) 3% NSR if gold price is more than US \$375 per ounce.

**Other Quebec Properties (b) (Continued)**

Joannes Township Properties

(iii) The Joannes Township properties, comprised of 39 claims, are governed by two agreements. The first agreement, with Aurizon Mines Ltd., covers 19 claims, was signed on December 18, 2008, giving Aurizon the right to earn a 100% interest in the claims by incurring exploration expenditures totaling \$650,000 and paying to Alexandria \$2 million in cash and Aurizon shares. On December 18, 2010, Alexandria received the final payment 213,845 shares from Aurizon (valued at \$1,600,000), completing the transaction. Alexandria retains no interest in the 19 claims and has reported a gain on disposition of mining rights of \$1,450,356 during the year ended April 30, 2011.

(iv) On July 10, 2006, the Company signed an option agreement with Falconbridge Limited (acquired by Xtrata plc) to earn a 50% interest in 20 mineral claims in Joannes Township, Quebec, by expending \$500,000 on exploration on the property by July 10, 2010. The Company has notified Xtrata that it has dropped the option on this property and thereby wrote off mining rights amounting to \$424,953 during the year ended April 30, 2011.

Quevillon Property

(v) The Company dropped its 100% interest in 29 claims located in Quevillon Township, Quebec during the year ended April 30, 2011 thereby writing off a further \$137,663 in mining rights.

Gwillim Property

(vi) The Gwillim property is comprised of 48 mineral claims, 11 of these claims are subject to 2% NSR, located in Barlow Township, Chibougamou Mining District, Quebec, of which the Company owns 100% mineral rights.

**Matachewan Property (c)**

The Matachewan Property is located in Cairo and Flavelle Townships, near Matachewan, Ontario. The property consists of 49 mineral claims, 39 of which the Company owns 100% mineral rights, subject to 2% NSR, and 10 of which are governed by a 50%-50% joint venture agreement with Carmax Explorations Ltd.

(i) On August 5, 2010, the Company completed a brokered private placement of 27,777,777 non flow-through units at \$0.18 per unit for gross proceeds of \$5,000,000. Each unit is comprised of one common share of the Company and one common share purchase warrant ("Warrant"), entitling the holder to acquire one additional common share of the Company at a price of \$0.22 for a period of one year from closing. A commission of \$236,442 and 1,313,567 Warrants, where each Warrant is exercisable at \$0.22 for a period of one year, were paid to Pollitt & Co. Inc., representing 6% of the brokered portion of the financing. Additionally, the Company has paid Pollitt & Co. Inc. a fiscal advisory fee of \$59,400 and 330,000 Warrants, where each Warrant is exercisable at \$0.22 for a period of one year.

The fair value of the 27,777,777 non-flow-through warrants was estimated using the Black-Scholes option pricing model based on the following assumptions: dividend yield of 0%; risk-free interest rate of 1.48%; expected life of one year; and expected volatility of 108%. A fair value of \$1,805,556 was estimated.

The fair value of the 1,643,567 broker warrants was estimated using the Black-Scholes option pricing model based on the following assumptions: dividend yield of 0%; risk-free interest rate of 1.48%; expected life of one year; and expected volatility of 108%. A fair value of \$106,832 was estimated.

---

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**8. SHARE CAPITAL (Continued)**

(ii) The Company made an application to the TSX Venture Exchange (the "Exchange") to amend certain terms of 27,777,777 warrants which were issued by the Company on August 5, 2010. Each warrant was exercisable at a price of \$0.22 per share until August 5, 2011. On July 25, 2011, the Exchange agreed that the Company could amend the terms of the warrants as follows: (i) extend the term of the warrants by one year until August 5, 2012.

The fair value of the amendment terms of the warrants of \$972,222 was estimated using the Black-Scholes option pricing model based on the following assumptions: dividend yield of 0%; risk-free interest rate of 1.50%; expected life of one year; and expected volatility of 79.75%. This amount was added to the previously calculated Black-Scholes option pricing model of \$1,805,556 for a combined total of \$2,777,778.

(iii) On October 26, 2011, the Company completed a \$3,000,000 private placement financing (the "Private Placement"). The Private Placement was completed by a syndicate of agents, led by Union Securities Ltd. and including Stonecap Securities Inc. (the "Agents"). The Private Placement consisted of 6,265,300 units ("Units") and 15,610,793 flow-through units ("FT Units") of the Company at a price of \$0.13 per Unit and \$0.14 per FT Units.

Each Unit consists of one common share of the Company and one transferable common share purchase warrant (a "Warrant"). Each whole Warrant entitles the holder to purchase one additional common share of the Company (a "Warrant Share") at a price of \$0.22 per Warrant Share for a period of 12 months from the completion of the Private Placement. Each FT Unit consists of one "flow-through" common share of the Company and one-half of one Warrant. The grant date fair value of \$221,452 (net of share issue costs) was assigned to the 14,070,697 Warrants issued as part of the Private Placement estimated using a fair value market technique incorporating the Black-Scholes option valuation model with the following assumptions: expected dividend yield of 0%, expected volatility of 89.69%, risk-free rate of return of 1.09% and an expected maturity of 1 year.

The Company paid the Agents a commission equal to 7% of the gross proceeds raised under the Private Placement and incurred additional transaction costs of \$53,951. In addition, the Agents received compensation options ("Broker Warrants") entitling the Agents to purchase such number of Units that is equal to 7% of the total number of Units and FT Units sold under the Private Placement. Each compensation option entitles the holder to purchase one Unit at a price of \$0.13 per Unit for a period of 24 months from completion of the Private Placement. The grant date fair value of \$91,880 was assigned to the 1,531,327 Broker Warrants estimated using a fair value market technique incorporating the Black-Scholes option valuation model with the following assumptions: expected dividend yield of 0%, expected volatility of 92.54%, risk-free rate of return of 1.09% and an expected maturity of 2 years.

(iv) The flow-through common shares issued in the Private Placement completed on October 26, 2011 were issued at a premium to the market price in recognition of the tax benefits accruing to subscribers. The flow-through premium was calculated to be \$259,139.

The flow-through premium is derecognized through income as the eligible expenditures are incurred. For the year ended April 30, 2012, the Company satisfied approximately \$212,887 of the commitment by incurring eligible expenditures of approximately \$1,795,000 and as a result the flow-through premium has been reduced to \$46,252.

**Years ended April 30, 2012 and April 30, 2011**

**9. STOCK OPTIONS**

The following table reflects the continuity of stock options for the year ended April 30, 2012:

	Number of stock options	Weighted average exercise price (\$)
<b>Balance, May 1, 2010</b>	7,723,000	0.18
Granted (i)(ii)	3,050,000	0.17
Exercised	(550,000)	0.08
Expired	(230,000)	0.16
Cancelled	(224,000)	0.18
<b>Balance, April 30, 2011</b>	9,769,000	0.18
Granted (iii), (iv), (v)	2,636,000	0.12
Exercised	(200,000)	0.15
Expired	(1,730,000)	0.24
Cancelled	(360,000)	0.17
<b>Balance, April 30, 2012</b>	10,115,000	0.16

(i) On October 12, 2010, the Company issued 2,700,000 incentive stock options to directors, officers, employees and consultants of the Company exercisable at a price of \$0.17 for a period of five years. The incentive stock options vest immediately.

For the purposes of the 2,700,000 incentive stock options, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 134.76%; risk-free interest rate of 1.90% and an expected average life of 5 years. The estimated value of \$529,200 was charged to share based payments and credited to reserve for share based payments for the year ended April 30, 2011.

(ii) On January 6, 2011, the Company issued 350,000 incentive stock options to consultants of the Company exercisable at a price of \$0.195 for a period of three years. The incentive stock options vest immediately.

For the purposes of the 350,000 incentive stock options, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 146.51%; risk-free interest rate of 1.97% and an expected average life of 3 years. The estimated value of \$54,600 was charged to share based payments and credited to reserve for share based payments for year ended April 30, 2011.

(iii) On May 9, 2011, the Company issued 250,000 incentive stock options to consultants of the Company exercisable at a price of \$0.19 for a period of 3 years. The incentive stock options vest immediately.

For the purpose of the 250,000 incentive stock options, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; risk-free interest rate of 2.00%; expected average life of three years; and expected volatility of 142.73%. The estimated value of \$35,250 was charged to share based payments and credited to reserve for share based payments for the year ended April 30, 2012.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

**Years ended April 30, 2012 and April 30, 2011**

**9. STOCK OPTIONS (Continued)**

(iv) On July 13, 2011, the Company issued 250,000 incentive stock options to consultants of the Company exercisable at a price of \$0.30 for a period of 1 year. Of these 50,000 vest immediately. The remaining 200,000 vest as follow: 25% vest three months from the issuance date, 25% vest six months from the issuance date, 25% vest nine months from the issuance date and 25% vest twelve months from the issuance date.

For the purpose of the 250,000 incentive stock options, the fair value of \$6,250 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; risk-free interest rate of 1.43%; expected average life of three years; and expected volatility of 79.71%. The estimated value of \$5,938 was charged to share based payments and credited to reserve for share based payments respectively for the year ended April 30, 2012.

(v) On January 20, 2012, the Company issued 2,136,000 incentive stock options to certain directors, officers, consultants, and employees of the Company exercisable at a price of \$0.095 for a period of two years. The incentive stock options vest immediately.

For the purpose of the 2,136,000 incentive stock options, the fair value of \$104,664 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; risk-free interest rate of 1.04%; expected average life of two years; and expected volatility of 92.04%. The estimated value of \$104,664 was charged to share based payments and credited to reserve for share based payments respectively for the year ended April 30, 2012.

The following table reflects the actual stock options issued and outstanding as of April 30, 2012:

Expiry Date	Options outstanding			Options exercisable

**10. WARRANTS**

The following table summarizes warrants that have been issued, exercised or have expired in each of the periods presented:

	Number of Warrants	Fair value (\$)
<b>Balance, April 30, 2010</b>	19,331,239	2,049,667
Warrants expired	(7,330,386)	(281,072)
Warrants issued on private placement (Note 8(b)(i))	27,777,777	1,805,556
Broker warrants issued on private placement (Note 8(b)(i))	1,643,567	106,832
Fair value of warrants exercised	(43,500)	(4,829)
<b>Balance, April 30, 2011</b>	<b>41,378,697</b>	<b>3,676,154</b>
Warrants expired	(13,600,920)	(1,870,598)
Warrants issued on private placement (Note 8(b)(iii))	14,070,697	221,452
Broker warrants issued on private placement (Note 8(b)(iii))	1,531,327	91,880
Warrants extension (Note 8(b)(ii))	-	972,222
<b>Balance, April 30, 2012</b>	<b>43,379,801</b>	<b>3,091,110</b>

As at April 30, 2012, the following warrants were outstanding. The warrants entitle the holders to purchase the stated number of common shares at the exercise price on or before the expiry date:

Fair Value	Expiry date	Number of warrants	Exercise price
\$ 2,777,778	August 5, 2012	27,777,777	\$ 0.22
94,753	October 26, 2012	6,265,300	0.22
126,699	October 26, 2012	7,805,397	0.22
91,880	October 26, 2012	1,531,327	0.13
<b>\$ 3,091,110</b>		<b>43,379,801</b>	

**11. BASIC AND DILUTED LOSS PER SHARE**

The following table sets forth the computation of basic and diluted loss per share:

	2012	2011
Numerator:		
Loss for the year	\$ (1,807,425)	\$ (639,447)
Numerator for basic and diluted loss per share	(1,807,425)	(639,447)
Denominator:		
Weighted average number of common shares	131,290,514	112,398,889
Denominator for basic loss per share	131,290,514	112,398,889
Denominator for diluted loss per share	131,290,514	112,398,889
Basic and diluted loss per share	\$ 0.01	\$ 0.00

The stock options and warrants were not included in the computation of diluted (loss) per share for 2012 and 2011 because their inclusion would be anti-dilutive.

**Years ended April 30, 2012 and April 30, 2011**

**12. RELATED PARTY TRANSACTIONS**

Related party transactions reflected below are in the normal course of operations and were made on terms equivalent to those that prevail in arm's length transactions.

The following transactions were carried out with related parties:

a) Purchase of services:

The following schedule shows expenses incurred during the years ended April 30, 2012 and 2011 with these companies.

	2012	2011
Yarnell Companies Inc. (i)	\$ 25,000	\$ 25,000
Baker Creek Management (ii)	126,000	60,000
Finterra Consulting Inc. (iii)	70,538	-
Legein Consulting Inc. (iv)	132,184	40,623

(i) During the years ended April 30, 2012 and 2011, the Company paid director fees to Yarnell Companies Inc., a company controlled by the chairman of the Company.

(ii) During the years ended April 30, 2012 and 2011, the Company paid management fees to Baker Creek Management (formerly Owens & Co. Ltd.), a company controlled by the Chief Executive Officer ("CEO") of the Company. \$73,842 of these fees are included in deferred exploration expenditures.

(iii) During the year ended April 30, 2012, the Company paid management fees to Finterra Consulting Inc., a company controlled by the Chief Financial Officer ("CFO") of the Company.

(iv) During the years ended April 30, 2012 and 2011, the Company paid management fees to Legein Consulting Inc., a company controlled by the Vice-President Exploration the Company. \$94,269 of these fees are included in deferred exploration expenditures.

b) Key management compensation:

Key management includes directors (executive and non-executive), and senior officers (CEO, CFO and VP Exploration). The compensation paid or payable to key management for employment services, in addition to the ones described under 12(a), is shown below:

	2012	2011
Salaries and fees	\$ 42,000	\$ 107,806
Director fees	\$ 10,000	\$ 10,000
Share-based payments	\$ 138,150	\$ 323,400

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

Years ended April 30, 2012 and April 30, 2011

**12. RELATED PARTY TRANSACTIONS (Continued)**

c) Period end balances owed to related parties:

	April 30, 2012	April 30, 2011	May 1, 2010
Yarnell Companies Inc.	-	4,000	-
Finterra Consulting Inc.	5,170	-	-
Legein Consulting Inc.	12,859	-	-
	<b>18,029</b>	4,000	-

**13. INCOME TAXES**

The Company has one deferred income tax liability which arose as a result of issuing flow-through shares to investors. Since the expenditures generated by the flow-through shares are renounced to the investors this lowers the tax bases of the resource properties and results in a deferred income tax liability.

	<u>2012</u>	<u>2011</u>
<b>Deferred income tax liabilities</b>		
Mining rights and deferred exploration expenditures	<b>\$ (1,357,794)</b>	\$ (897,901)
<b>Deferred income tax assets</b>		
Non-capital losses used to reduce the deferred income tax liability	191,747	181,000
Cumulative eligible capital	18,884	13,755
Share issuance costs and other	132,370	152,309
<b>Net deferred income tax liability</b>	<b>\$ (1,014,793)</b>	\$ (550,837)

The Company's income tax expense (recovery) for each of the years ended April 30, 2012 and 2011 is as follows:

	<u>2012</u>	<u>2011</u>
Current income tax expense	\$ -	\$ -
Deferred income tax expense (recovery)	284,787	(123,373)
<b>Total income tax expense (recovery)</b>	<b>\$ 284,787</b>	\$ (123,373)

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**  
**Years ended April 30, 2012 and April 30, 2011**

**13. INCOME TAXES (continued)**

The Company's income tax expense (recovery) for the year ended is made up as follows:

	<u>2012</u>	<u>2011</u>
(Loss) before income taxes	\$ (1,522,638)	\$ (762,820)
Income tax recovery at the combined federal and provincial rate of 27.58% (2010- 29.83%)	(419,944)	(227,549)
Non-deductible stock-option compensation	40,226	180,324
Expiry of warrants	257,955	41,922
Tax effect of flow-through expenditures	575,023	-
Non-taxable portion of capital gain on investment in available for sale securities	63,346	(41,330)
Non-deductible write-off of mining rights	-	167,828
Rate change on deferred tax balance	41,889	-
Canadian development and exploration expenses utilized	(219,836)	(346,431)
Other	(53,872)	101,863
<b>Total income tax expense (recovery)</b>	<b>\$ 284,787</b>	<b>\$ (123,373)</b>

The Company has non-capital loss carryforwards of approximately \$724,000, Canadian exploration and development expenditures of approximately \$11,103,000 which can be used to reduce future year's taxable income. The potential tax benefit of these losses and expenditures, has not been recognized in these financial statements. The non-capital losses will expire as follows:

2028	\$ 526,000
2030	198,000
	<u>\$ 724,000</u>

**14. SEGMENTED INFORMATION**

The Company's operations comprise a single reporting operating segment engaged in mineral exploration in Canada. As the operations comprise a single reporting segment, amounts disclosed in the financial statements as loss for the period also represent segment amounts. All of the Company's operations and assets are located in Canada.

**15. COMMITMENTS**

- (i) The Company is obligated under an operating lease for rental of office space in Val-d'Or, Quebec, in the amount of \$3,600 per month expiring August 1, 2012.
- (ii) The Company is obligated under an operating lease for rental of office space in Toronto, Ontario, in the amount of \$6,844 per month plus applicable operating costs expiring October 31, 2016.
- (iii) As at April 30, 2012, the Company had drilling commitments of approximately \$Nil (April 30, 2011 - \$1,300,000, May 1, 2010 - \$Nil).
- (iv) The Company is required to incur qualifying expenditures of approximately \$390,000 no later than December 31, 2012 as a result of the flow-through common shares issued (Note 8 (iii)).

---

**16. CONVERSION TO IFRS**

**(i) Overview**

As stated in Significant Accounting Policies (Note 2), these financial statements are prepared in accordance with IFRS as issued by the IASB.

The policies set out in the Significant Accounting Policies section have been applied in preparing the financial statements years ended April 30, 2012 and 2011 and in the preparation of an opening IFRS financial position at May 1, 2010 (the Company's Transition Date).

**(ii) First-time adoption of IFRS**

The adoption of IFRS requires the application of IFRS 1, which provides guidance for an entity's initial adoption of IFRS. IFRS 1 generally requires retrospective application of IFRS as effective at the end of its first annual IFRS reporting period. However, IFRS 1 also provides certain optional exemptions and mandatory exceptions to this retrospective treatment.

The Company has elected to apply the following optional exemptions in its preparation of an opening IFRS balance sheet as at May 1, 2010, the Company's Transition Date.

- To apply IFRS 2, Share based Payments only to equity instruments that were granted after November 7, 2002 and had not vested by the Transition Date.
- To apply IFRS 3, Business Combinations prospectively from the Transition Date, therefore not restating business combinations that took place prior to the Company's Transition Date.
- To apply IFRIC 1, Changes in Existing Decommissioning, Restoration and Similar Liabilities prospectively from the Company's Transition Date. IFRIC 1 provides guidance regarding the treatment of changes in decommissioning, restoration and similar liabilities.
- To apply IAS 23, Borrowing Costs prospectively from the Company's Transition Date. IAS 23 requires the capitalization of borrowing costs directly attributable to the acquisition, production or construction of certain assets.

IFRS 1 does not permit changes to estimates that have been made previously. Accordingly, estimates used in the preparation of the Company's opening IFRS balance sheet as at the Transition Date are consistent with those that were made under Canadian GAAP.

The Company's Transition Date IFRS balance sheet is included as comparative information in the statements of financial position in these financial statements.

**ALEXANDRIA MINERALS CORPORATION**  
**NOTES TO FINANCIAL STATEMENTS**  
**(Expressed in Canadian Dollars)**

---

**Years ended April 30, 2012 and April 30, 2011**

---

**16. CONVERSION TO IFRS (CONTINUED)**

**(iii) Changes to accounting policies**

The Company has changed certain accounting policies to be consistent with IFRS . The changes to its accounting policies have resulted in certain changes to the recognition and measurement of assets, liabilities, equity, revenue and expenses within its financial statements.

The following summarizes the significant changes to the Company's accounting policies on adoption of IFRS.

(a) Impairment of (non-financial) assets

IFRS requires a write down of assets if the higher of the fair market value and the value in use of a group of assets is less than its carrying value. Value in use is determined using discounted estimated future cash flows. Current Canadian GAAP requires a write down to estimated fair value only if the undiscounted estimated future cash flows of a group of assets are less than its carrying value.

The Company's accounting policies related to impairment of non-financial assets have been changed to reflect these differences. There was no impact on the financial statements.

(b) Decommissioning liabilities (asset retirement obligations)

IFRS requires the recognition of a decommissioning liability for legal or constructive obligations, while current Canadian GAAP only requires the recognition of such liabilities for legal obligations. A constructive obligation exists when an entity has created reasonable expectations that it will take certain actions.

The Company's accounting policies related to decommissioning liabilities have been changed to reflect these differences. There is no impact on the financial statements.

(c) Property and Equipment

IAS 16, Property, Plant and Equipment, requires the Company to choose, for each class of capital assets, between the cost model or the revaluation model. The Company has selected the cost model in accounting for all of its capital assets.

The Company has changed its accounting policies to reflect the requirement under IAS 16 that when an item of property and equipment comprises major components with different useful lives, the components are accounted for as separate items of property and equipment and amortized over their respective useful lives. This change in accounting policies did not have a significant impact on the Company's financial statements.

**ALEXANDRIA MINERALS CORPORATION**

**(Expressed in Canadian Dollars)**  
**Years ended April 30, 2012 and April 30, 2011**

**16. CONVERSION TO IFRS (CONTINUED)**

**(iii) Changes to accounting policies (Continued)**

(d) Flow-through shares

Under Canadian GAAP, when flow-through shares are issued, they are initially recorded in share capital at their issue price. On the date the expenses are renounced (by filing the prescribed forms) to the investors, a future tax liability is recognized as a cost of issuing the shares (a reduction in share capital). Under IFRS, flow-through shares are recognized based on the quoted price of the existing shares on the date of the issue or based on the share price of the last private placement of non-flow-through common shares. The difference between the amount recognized in common shares and the amount the investors pays for the shares ("premium") is recognized as an other liability which is reversed into earnings as premium on flow-through shares when eligible expenditures have been made.

**Impact on Statements of Financial Position**

	<b>April 30, 2012</b>	April 30, 2011	May 1, 2010
Adjustment to share capital	\$ 2,552,920	\$ 2,552,920	\$ 2,552,920
Adjustment to deficit	\$ (2,552,920)	\$ (2,552,920)	\$ (2,552,920)

(e) Presentation

Certain amounts in the statements of financial position, statements of comprehensive loss and statements of cash flows have been reclassified to conform to the presentation adopted under IFRS.
