

Alexandria Minerals Corporation

Interim Financial Statements

(Unaudited)

Three and six months ended October 31, 2009

(Expressed in Canadian Dollars)

(A Development Stage Company)

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying unaudited interim financial statements of Alexandria Minerals Corporation (A Development Stage Entity) were prepared by management in accordance with Canadian generally accepted accounting principles. The most significant of these accounting principles have been set out in the April 30, 2009 audited financial statements. Only changes in accounting policies have been disclosed in these unaudited interim financial statements, including responsibility for significant accounting judgments and estimates and the choice of accounting principles and methods that are appropriate to the Company's circumstances.

Management has established processes, which are in place to provide them sufficient knowledge to support management representations that they have exercised reasonable diligence that (i) the unaudited interim financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the unaudited interim financial statements and (ii) the unaudited interim financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of and for the periods presented by the unaudited interim financial statements.

The Board of Directors is responsible for reviewing and approving the unaudited interim financial statements together with other financial information of the Company and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee assists the Board of Directors in fulfilling this responsibility. The Audit Committee meets with management to review the financial reporting process and the unaudited interim financial statements together with other financial information of the Company. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the unaudited interim financial statements together with other financial information of the Company for issuance to the shareholders.

Management recognizes its responsibility for conducting the Company's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

NOTICE TO READER

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these unaudited interim financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

ALEXANDRIA MINERALS CORPORATION
NOTES TO INTERIM FINANCIAL STATEMENTS
(Unaudited)
(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

1. NATURE OF BUSINESS AND GOING CONCERN

Alexandria Minerals Corporation ("Alexandria" or the "Company") is engaged in the acquisition, exploration and development of mineral resource properties in Canada. The Company is in the process of exploring, and has not yet determined whether there is an economically viable ore deposit on its properties. The Company was incorporated on May 27, 2002. To date, the Company has not earned revenue from its mineral properties and is considered to be a development stage entity as defined by the Canadian Institute of Chartered Accountants (the "CICA") Accounting Guideline 11.

In order to meet future expenditures and cover administrative costs, the Company will need to raise additional financing. The Company has had recurring losses and will require additional financing to fund its continuing exploration efforts. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favourable to the Company. These unaudited interim financial statements have been prepared on a going concern basis that assumes the Company will be able to continue to realize its assets and discharge its liabilities in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. Other than the current economic slowdown, management is not aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern.

In the event the Company is not able to obtain adequate funding, there is uncertainty as to whether the Company will be able to maintain and complete the acquisition and development of its property interests. These unaudited interim financial statements do not reflect the adjustments to the carrying values of assets and liabilities that would be necessary if the Company were unable to obtain adequate financing. Changes in future conditions could require material write downs of the carrying values of certain assets.

2. BASIS OF PRESENTATION AND NEW ACCOUNTING POLICIES

The unaudited interim financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles ("GAAP"). The preparation of the unaudited interim financial statements is based on accounting policies and practices consistent with those used in the preparation of the audited annual financial statements except as noted below. The accompanying unaudited interim financial statements should be read in conjunction with the notes to the Company's audited financial statements for the year ended April 30, 2009, since they do not contain all disclosures required by Canadian GAAP for annual financial statements. These unaudited interim financial statements reflect all normal and recurring adjustments which are, in the opinion of management, necessary for a fair presentation of the respective unaudited interim periods presented.

Mining Exploration Costs

On March 27, 2009, the Emerging Issues Committee of the CICA approved an abstract EIC-174, "Mining Exploration Costs", which provides guidance on capitalization of exploration costs related to mining properties in particular, and on impairment of long-lived assets in general. The adoption of this abstract had no impact on the Company's presentation of its financial position or results of operations as at October 31, 2009.

ALEXANDRIA MINERALS CORPORATION
NOTES TO INTERIM FINANCIAL STATEMENTS
(Unaudited)
(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

2. BASIS OF PRESENTATION AND NEW ACCOUNTING POLICIES (continued)

Future Accounting Changes

International Financial Reporting Standards ("IFRS")

In January 2006, the CICA's Accounting Standards Board ("AcSB") formally adopted the strategy of replacing Canadian GAAP with IFRS for Canadian enterprises with public accountability. The current conversion timetable calls for financial reporting under IFRS for accounting periods commencing on or after January 1, 2011. On February 13, 2008 the AcSB confirmed that the use of IFRS will be required in 2011 for publicly accountable profit-oriented enterprises. For these entities, IFRS will be required for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The Company is currently assessing the impact of IFRS on its financial statements.

3. CAPITAL MANAGEMENT

When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to achieve optimal returns to shareholders and benefits for other stakeholders. Management adjusts the capital structure as necessary in order to support the acquisition, exploration and development of its mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management team to sustain the future development of the business. The Company considers its capital to be equity, which is comprised of share capital, warrants, contributed surplus, accumulated other comprehensive income and deficit which at October 31, 2009 totaled \$10,308,175 (April 30, 2009 - \$10,448,282).

The properties in which the Company currently has an interest are in the exploration stage. As such the Company is dependent on external financing to fund its activities. In order to carry out its planned exploration programs and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts when economic conditions permit it to do so.

Management has chosen to mitigate the risk and uncertainty associated with raising additional capital in current economic conditions by:

- (i) minimizing discretionary disbursements;
- (ii) reducing or eliminating exploration expenditures that are of limited strategic value; and
- (iii) exploring alternative sources of liquidity.

In light of the above, the Company will continue to assess new properties and seek to acquire an interest in additional properties if the Company believes there is sufficient potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is appropriate. There were no changes in the Company's approach to capital management during the three and six months ended October 31, 2009.

The Company is not subject to any capital requirements imposed by a regulator or lending institution. The Company expects that its current capital resources will be sufficient to discharge its liabilities as at October 31, 2009.

ALEXANDRIA MINERALS CORPORATION
NOTES TO INTERIM FINANCIAL STATEMENTS
(Unaudited)
(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

4. PROPERTY AND FINANCIAL RISK FACTORS

(a) Property risk

The Company's significant projects are the Orenada, Akasaba, Sleepy and Other Cadillac Break Properties together with the Other Quebec Properties and, in Ontario, the Matachewan Property. Unless the Company acquires or develops additional significant properties, the Company will be solely dependent upon these properties. If no additional mineral resource properties are acquired by the Company, any adverse development affecting these properties would have a material adverse effect on the Company's financial condition and results of operations.

(b) Financial risk factors

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate and commodity and equity price risk). Risk management is carried out by the Company's management team with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents, sales tax and sundry receivable and Quebec refundable tax credits and mining duties receivable. Cash and cash equivalents are held with a reputable Canadian chartered bank, from which management believes the risk of loss to be minimal.

Financial instruments included in sales tax and sundry receivable comprise of sales tax receivable from government authorities in Canada and deposits held with service providers. Sales tax and sundry receivable are in good standing as of October 31, 2009. Management believes that the credit risk concentration with respect to financial instruments included in sales tax and sundry receivable is minimal.

Financial instruments included in Quebec refundable tax credits and mining duties receivable comprise of mining expenditure refunds from the Quebec Government (Canada). Quebec refundable tax credits and mining duties receivable are in good standing as of October 31, 2009. Management believes that the credit risk concentration with respect to financial instruments included in Quebec refundable tax credits and mining duties receivable is minimal.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at October 31, 2009, the Company had cash and cash equivalents and short term investments of \$851,289 (April 30, 2009 - \$1,653,768) to settle current liabilities of \$228,558 (April 30, 2009 - \$225,442). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

ALEXANDRIA MINERALS CORPORATION
NOTES TO INTERIM FINANCIAL STATEMENTS
(Unaudited)
(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

4. PROPERTY AND FINANCIAL RISK FACTORS (continued)

(b) Financial risk factors (continued)

Market risk

Interest rate risk

The Company has cash and cash equivalents balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by the Company's Canadian chartered bank. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its bank.

Commodity and equity price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, as it relates to precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

The Company's investments in NioGold Mining Corporation ("Niogold") and Aurizon Mines Ltd. ("Aurizon") are subject to fair value fluctuations arising from changes in the Canadian mining sector and equity markets and currently amount to \$330,495.

Sensitivity analysis

The Company has, for accounting purposes, designated its cash and cash equivalents as held for trading, which is measured at fair value. Sales tax and sundry receivable and Quebec refundable tax credits and mining duties receivable are classified for accounting purposes as loans and receivables, which are measured at amortized cost which equals fair value. Investments are classified for accounting purposes as available-for-sale, which are measured at fair value. Accounts payable and accrued liabilities are classified for accounting purposes as other financial liabilities, which are measured at amortized cost which also equals fair value.

As of October 31, 2009, the carrying and fair value amounts of the Company's financial instruments are approximately equivalent.

ALEXANDRIA MINERALS CORPORATION
NOTES TO INTERIM FINANCIAL STATEMENTS
(Unaudited)
(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

4. PROPERTY AND FINANCIAL RISK FACTORS (continued)

(b) Financial risk factors (continued)

Sensitivity analysis (continued)

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a six month period:

(i) Cash equivalents include a guaranteed investment certificate that is subject to a floating interest rate. As at October 31, 2009, if the interest rate had decreased/increased by 1% with all other variables held constant, the loss for the six months ended October 31, 2009 would have been approximately \$2,600 higher/lower, as a result of lower/higher interest income from the guaranteed investment certificate. As at October 31, 2009, equity would have been approximately \$2,600 lower/higher as a result of interest income from the guaranteed investment certificate.

(ii) The Company's other investments amounting to \$330,495 are subject to fair value fluctuations. As at October 31, 2009, if the fair value of the Company's other investments had decreased/increased by 50% with all other variables held constant, comprehensive loss for the six months ended October 31, 2009 would have been approximately \$165,000 higher/lower. Similarly, as at October 31, 2009, reported shareholders' equity would have been approximately \$165,000 lower/higher as a result of a 50% decrease/increase in the fair value of the Company's other investments.

(c) Other risk factors

(i) Mineral property risk is significant. In particular, if an economic ore body is not found, the Company cannot enter into commercial production and generate sufficient revenues to fund its continuing operations. There can be no assurance that the Company will generate any revenues or achieve profitability or provide a return on investment in the future from any of the properties it may have an interest in.

(ii) Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the world market price of precious metals. Precious metal prices have fluctuated widely in recent years. There is no assurance that, even as commercial quantities of precious metals may be produced in the future, a profitable market will exist for them. A decline in the market price of precious metals also will require the Company to reduce its mineral resources, which could have a material and adverse effect on the Company's value. As of October 31, 2009, the Company was not a precious metals producer. As a result, commodity price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

The Company has retained an interest in, through option agreement or through staking, several gold exploration properties in Ontario and Quebec, Canada. All properties are located in areas adjacent to past or present mines, and all have indications of gold on the surface and in the subsurface. The properties are considered to be early stage exploration properties, and there are uncertainties with regard to the discovery of economically viable ore deposits on them.

On a quarterly basis, management of the Company review exploration costs to ensure deferred expenditures include only costs and projects that are eligible for capitalization. For a description of the mining rights and deferred exploration expenditures owned by the Company, refer to Note 7 of the audited financial statements as at April 30, 2009. Specific changes to mining rights and deferred exploration expenditures that occurred from May 1, 2009 to October 31, 2009 are as follows:

(i) On June 17, 2009, the Company issued 641,026 common shares (valued at \$166,667) of Alexandria to comply with the option agreement to earn 100% in the Akasaba, Bloc Sud West, Sleepy and Bloc Sud Trivio Properties.

(ii) On June 17, 2009, the Company issued 100,000 common shares (valued at \$36,000) of Alexandria to comply with the option agreement to earn 100% in 19 claims in Bourlamaque Township (the "Robert Property").

(Expressed in Canadian Dollars)
(A Development Stage Entity)

Three and six months ended October 31, 2009

7. MINING RIGHTS AND DEFERRED EXPLORATION EXPENDITURES (continued)

(iii) The Company purchased 100% interest in Teck Resources Limited's ("Teck") interest in the Annamaque Property. The terms of the Annamaque Purchase and Sale agreement, signed on June 22, 2009, are that for a 100%, Alexandria will issue to Teck 250,000 units (issued), consisting of one common share of the Company and one share purchase warrant exercisable at \$0.15 for two years. The property is subject to a 2% Net Smelter Return Royalty ("NSR"), one-half of which may be purchased by the Company for \$800,000.

The Company purchased 100% of Teck's interest in the Valdora Property (51% of the total interest) by issuing to Teck 75,000 units, each unit consisting of one common share of the Company and one share purchase warrant exercisable at \$0.15 for two years. The property is subject to a fractional 2% NSR (2% of Teck's 51%), one half of which can be purchased for \$200,000.

On July 8, 2009, the Company issued 325,000 units (valued at \$17,875) of Alexandria to comply with the Annamaque Purchase and Sale agreement and Valdora Property purchase. The fair value of each share purchase warrant was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 165.53%; risk-free interest rate of 1.16% and an expected average life of 2 years. The estimated value of the share purchase warrants was determined to be \$13,650.

(iv) On July 29, 2009, the Company issued 75,000 units (valued \$4,800) of Alexandria to acquire the remaining 49% interest in the Valdora Property, bringing the total interest in the property to 100%. Each unit consists of one common share of Alexandria plus one share-purchase warrant, where each warrant is exercisable for 2 years at \$0.15. The interest is subject to a 1% Net Smelter Return royalty, of which ½ may be purchased for \$200,000.

The fair value of each share purchase warrant was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 165.77%; risk-free interest rate of 1.45% and an expected average life of 2 years. The estimated value of the share purchase warrants was determined to be \$3,150.

(v) On August 31, 2009, the Company announced that it has agreed to participate in the joint acquisition, with Niogold, of five new claims being added to the Company's Siscoe East Property in Val d'Or. The Company issued 140,871 common shares (valued at \$9,438) and paid \$15,000 in cash to participate in the joint acquisition. Niogold will earn a 50% interest in the Siscoe East Property by spending a total of \$750,000 on exploration, and issuing to the Company 650,000 common shares of Niogold, by June 25, 2011.

(A Development Stage Entity)

Three and six months ended October 31, 2009

7. MINING RIGHTS AND DEFERRED EXPLORATION EXPENDITURES (continued)

(vi) On September 30, 2009, the Company reported that it has optioned one claim from its Airport Property in Val d'Or to Kalahari Resources Inc. ("Kalahari"). The terms of the agreement with Kalahari for the Airport claim include a payment of \$25,000 cash (\$10,000 received) to the Company and the issuance of 500,000 Kalahari common shares to the Company over a period of twelve months, as well as incurring \$35,000 in exploration expenditures over a period of 24 months. Alexandria retains a 2% NSR, one half of which may be purchased for \$1,000,000.

(vii) On October 15, 2009, the Company announced that it has agreed to participate jointly with Niogold on the addition of four claims adjacent to its Siscoe East Property in Val d'Or. The Company will meet its commitment to maintain its 50% interest in these claims by paying to Niogold \$15,000 (paid on November 23, 2009) and 120,000 (issued on November 19, 2009) common shares of the Company.

9. STOCK OPTIONS

The following table reflects the continuity of stock options for the six months ended October 31, 2009:

	Number of Stock options	Weighted average exercise price (\$)
Balance, April 30, 2009	7,034,000	0.19
Granted (i)(ii)	450,000	0.10
Cancelled	(30,000)	0.23
Balance, October 31, 2009	7,454,000	0.19

(i) The weighted average grant date fair value of the total incentive stock options granted was \$0.04.

(ii) On May 29, 2009, the Company granted an aggregate of 450,000 stock options exercisable at a price of \$0.10. 200,000 of these stock options are exercisable for a period of 5 years. The remaining 250,000 stock options are exercisable for 2 years.

For the purposes of the 200,000 stock options, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 144.80%; risk-free interest rate of 2.51% and an expected average life of 5 years. The estimated value was determined to be \$8,600. The impact on expenses for the three and six months ended October 31, 2009 was \$3,000 and \$6,084 respectively and was charged to stock-option compensation and credited to contributed surplus. The remaining value will be expensed as the related option vest.

For the purposes of the 250,000 stock options, the fair value of each option was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions: expected dividend yield of 0%; expected volatility of 162.74%; risk-free interest rate of 1.27% and an expected average life of 2 years. The impact on expenses for the three and six months ended October 31, 2009 was \$nil and \$8,250 respectively and was charged to stock-option compensation and credited to contributed surplus.

10. WARRANTS (continued)

As at October 31, 2009, the following warrants were outstanding. The warrants entitle the holders to purchase the stated number of common shares at the exercise price on or before the expiry date:

	Fair Value	Expiry date	Number of warrants	Exercise price
	\$ 51,250	July 18, 2010	1,250,000	\$ 0.23
	189,600	July 18, 2010	4,861,539	0.25
	40,222	August 1, 2010	1,218,847	0.25
(Note 7(iii))	13,650	July 8, 2011	325,000	0.15
(Note 7(iv))	3,150	July 29, 2011	75,000	0.15
	\$ 297,872		7,730,386	

11. RELATED PARTY TRANSACTION

The Executive Vice President of the Company is one of the optionors in the Gwillim Property and charges the Company \$1,400 per month for the rent of premises in Val d'Or. This arrangement ceased during the the second quarter ended October 31, 2009.

These related party transactions are in the normal course of operations and were measured at the exchange amount which is the amount established and agreed to by the related parties.

12. SEGMENTED INFORMATION

The Company's operations comprise a single reporting operating segment engaged in mineral exploration in Canada. As the operations comprise a single reporting segment, amounts disclosed in the unaudited interim financial statements as loss for the period also represent segment amounts.

All of the Company's operations and assets are located in Canada.

13. COMPARATIVE FIGURES

Certain comparative figures have been reclassified to conform with current period presentation.

14. COMMITMENTS

(i) The Company is obligated under an operating lease for rental of office properties to an amount of approximately \$7,515 expiring May 31, 2010.

(ii) The Company has drilling commitments of \$210,000 and expects to complete those commitments in the fall of 2009.

15. RIGHTS PLAN

The Board of Directors of the Company has adopted a Shareholder Rights Plan (the "Rights Plan"). The Rights Plan was adopted by the independent directors of Alexandria and was approved by TSX Venture Exchange and by shareholders at the Company's general meeting of the shareholders on September 24, 2009. Subsequent to certification by Alexandria shareholders, the Rights Plan is in effect for an initial term of three years and is subject to reconfirmation by shareholders at the third annual meeting held after each confirmation.

The Rights Plan is designed both to encourage the fair and equal treatment of Alexandria's shareholders in connection with any potential take-over bid and to ensure that the Company's shareholders and its Board of Directors, in compliance with securities laws, have sufficient time to consider whether there are other options that would more effectively maximize shareholder value. The Rights Plan cannot be utilized to deny shareholders the opportunity to tender into any tender offer and is not designed to entrench management or Alexandria's Board. The terms of the Rights Plan are similar to those in rights plans recently approved by shareholders of other Canadian corporations.

Under the terms of the Rights Plan, one right (a "Right") has been issued in respect of each outstanding common share of the Company at the close of business July 20, 2009 and in respect of each common share or other voting share of the Company issued thereafter (subject to the terms of the Rights Plan). A Right only becomes exercisable upon the occurrence of a Flip-In Event, which is a transaction by which a person becomes an Acquiring Person and which otherwise does not meet the requirements of a Permitted Bid. An Acquiring Person is generally a person who becomes the beneficial owner of 20% or more of the outstanding common shares of the Company without complying with the "Permitted Bid" provisions of the Rights Plan or without approval of Alexandria's Board of Directors. Should a Flip-In Event occur, subject to all other provisions of the Rights Plan, each Right would entitle a holder, other than the Acquiring Person or persons related to it, to purchase common shares of Alexandria at a significant discount to the then current market price. A "Permitted Bid" is a bid made by way of a take-over bid circular to all Alexandria shareholders that is open for at least 60 days. If at the end of such period more than 50% of Alexandria's then outstanding common shares, other than those common shares owned by the party making the bid and certain related persons, have been tendered to the bid, such party may take up and pay for the common shares but must extend the bid for a minimum of 10 business days to allow other shareholders to tender.

The Rights issued under the Rights Plan will initially attach to and trade with Alexandria's common shares and no separate certificates will be issued unless an event triggering these Rights occurs.

16. SUBSEQUENT EVENT

On December 23, 2009, Alexandria announced that it has closed its non-brokered private placement ("NBPP") totaling \$629,620 on December 22, 2009.

The NBPP consists of 4,497,286 Flow-Through ("FT") units, priced at \$0.14 per unit. Each FT unit consists of one common share of the Company and one-half (1/2) of one purchase warrant, with each whole warrant entitling the holder to acquire one additional non-flow through (NFT) common share of the Company at a price of \$0.20 for a period of 18 months from closing. The securities issued under the private placement will be subject to a hold period of four months and one day from the date of closing, being April 24, 2010.

A finders fee consisting cash and brokers warrants, each 7% of the proceeds, was paid to Canaccord Financial Ltd. (\$490), Pollit & Co. Ltd (\$980), First Canadian Capital Corp. (\$2,940), Union Securities Ltd. (\$4,684), Haywood Securities ITF Bolder Investment (\$1,372), Trinity Wood Capital Corporation in Trust (\$7,350), Anthem Capital Group Inc. (\$8,747) and Barrington Capital Corporation (\$8,747).
