Small cap Canada focused gold exploration and development stock **Alexandria Minerals Corp** (OTCQB: [ALXDF](#); TSE: [AZX.V](#)) has just **begun** a 30,000 metre drilling program at its Orenada Zone 4 gold project in Val d'Or, Quebec. Alexandria Minerals Corp is searching for gold much closer to home for many investors as the Company has a portfolio of strategic properties located in the world-class mining districts of Val d'Or, Quebec; Red Lake, Ontario; and Snow Lake-Flin Flon, Manitoba:

Last year, Alexandria Minerals Corp completed an Option/Joint Venture on three of its projects (in Matachewan, Ontario; Chibougamau, Quebec; and eastern Val d'Or) to enable the Company to focus on its flagship western Cadillac Break Properties in the Val d'Or. Cadillac Break is a major regional fault zone where mines have produced some 100 million ounces of gold over the past 90 years while the Company's properties themselves have been explored by various operators since the early 1930s with over 2,400 drill holes completed since that time.

The Company aims to develop Val d'Or and its other properties by partnering with other companies who can provide added value.

The summer drilling program is specifically focused on defining and expanding the Company's near-surface gold resources in and around Zone 4, where it has identified a stacked, high grade gold vein system. The Zone 4 property is located seven kilometres southeast of Val d'Or, Quebec, at the western end of the Company's 35 kilometre-long property package. Three drill

rigs are now on site where the focus is infill drilling in the open pit area as well as step-out drilling to the west and also to the east toward Zone 2.

The CEO stated:

“We’re well-capitalized and ready to build upon the success of our winter program, which was our first comprehensive drill program to test for high-grade gold veins at Zone 4. Although some assays are still pending from that program, it has already extended the length of the veins from 300 metres to 700 metres along strike. This summer we look to expand on that further by focusing on a two kilometre stretch east and west of Zone 4.”

Alexandria Minerals Corp has issued a steady flow of news over the past few months:

- [**ALEXANDRIA CONFIRMS HIGH GRADE GOLD FROM VEINS IN EASTERN STEP-OUT HOLES WITH ASSAYS UP TO 18.06 G/T GOLD OVER 1.0 M AT ORENADA ZONE 4**](#) **13 Jun 2017**
- [**ALEXANDRIA DRILLING EXPANDS GOLD MINERALIZATION AT ORENADA ZONE 4, INTERSECTS 9.00 G/T GOLD OVER 13.89 METERS AND 3.82 G/T GOLD OVER 63.70 METERS**](#) **10 May 2017**
- [**ALEXANDRIA CONTINUES TO EXTEND MINERALIZED VEIN SETS WITH ASSAYS UP TO 22.40 G/T GOLD OVER 1.25 METERS AT ORENADA ZONE 4**](#) **27 Apr 2017**

Last March, Alexandria Minerals Corp listed on the OTC Market Group’s [**OTCQB Venture Market**](#) – the middle tier of the [**over-the-counter \(OTC\) market**](#) intended for entrepreneurial and development stage US and international companies. While there are no financial or qualitative standards for a company to be listed on the OTCQB market, OTCQB stocks are said to be committed to both disclosure and transparency. They are also considered to be less speculative in nature than stocks that trade on the OTC Pink market (the bottom tier of the OTC market).
